

## The Goby Republic Story.

The Goby Republic is an idea initially hatched by a couple of dive buddies as a way to get rich quick. We were going to haul a load of gravel out on the ice to a shoal to create an island. We would then declare the island an independent nation, the Goby Republic, and declare war on the nearby township of Nassewaupee. When we were ultimately defeated by Nassewaupean army, they would pump billions into our fledgling nation to rebuild our infrastructure. We would skim a few million for ourselves and become Gobian Oligarchs. Ten years have passed, no gravel has been hauled, and the Goby Republic Navy only consists of one vessel "The Spawn of Pliadies." Which I would enjoy using to take you out to explore the many historic shipwrecks surrounding the Door County Peninsula.
